Watering Guide

After backfilling the hole, give the plant a deep soaking around the base. Place the irrigation device to deliver water slowly to the root ball to create a puddle. Follow watering guidelines below. Supplemental watering may be required for some plants and trees for several years after planting. Rainfall of ½” replaces one watering. Be aware of local watering restrictions and follow them accordingly.

	Weeks 1-3	Weeks 4-6	Next 3 Months	Next 6 Months
Plants	Every Day	Every Other Day	2x Weekly	1-2x Weekly
Trees	Every Day	Every Day	3x Weekly	2x Weekly
Sod	Every Day	Every Other Day	2x Weekly	1-2x Weekly

Establishment Times

Herbaceous perennials, bunch grasses, ferns, aquatics: 4 weeks to 3 months

Small Shrubs: 6 months to 1 year depending on species

Larger shrubs, palms, and trees: 3 to 6 months per inch of trunk diameter. This is one year or more in most instances.

Exceptions do exist. If in doubt, ask a nursery specialist via email, phone, or in person.

Warranty

All materials used will be true to specifications with a 90 day warranty on INSTALLED materials with adherence to the above guidelines, unless otherwise specified in alternative written instructions.

There is no guarantee for plant survival or performance if the job site lacks a permanent, automatic, and functional irrigation system. Wilcox Nursery and Landscape is not responsible for any sod, transplants, plants kept as container plants, and annual plants. Wilcox Nursery and Landscape is not responsible for losses or damage to any materials due to neglect or by an act of God such as, but not limited to cold, disease, excessive rain, flooding, wind, hail, or drought.

All underground irrigation, cable, phone, gas, water and sewer, or other subsurface obstacles must be located by the property owner before the commencement of work. Wilcox Nursery and Landscape or agents are not responsible for damages to unmarked subsurface obstacles.
